To Whom It May Concern:

We have worked with Frank X. Spencer and Associates, Inc. since 1989. The firm has consistently presented the most acceptable bids, and the workmanship has been excellent. Presidio County has had the difficult task of juggling many projects at once, and they are all related to grant money and deadlines from the Texas Department of Human Resources and Community Affairs.

These projects funded by the state provide water and sewage facilities to Presidio County's colonias located in areas that are most likely to be geographically remote with very unwelcoming terrain. We have had several street construction projects as well. And with state grant money involved, we are under the most rigid of standards and time constraints. Mr. Spencer and his associates are all fine engineers with an excellent working grasp of on-site construction and expeditious solutions to any difficulties encountered.

Mr. Spencer and his associates have successfully completed all twelve of these projects over the last ten years on time and within budget. We will be opening up the next project for Las Palmas for bids soon and anticipate that specifications will meet our usual high expectations. Additionally, I must remark that Mr. Spencer and all of his staff are pleasant people and truly enjoyable to work with.

Sincerely,

Jack W. Brunson
